दिनांक/Date 11 April 2013

Dear Shri Kapoor

Defence Research and Development Establishment, Gwalior is one of the premier establishments of DRDO and working on Defence against Toxic Chemical and Biological Warfare Agents. One of our objectives is to create awareness about chemical safety and management of the hazardous chemicals to all concerned.

Working knowledge of Chemical Weapons & their hazards is a field of great importance for any security agency. In fact, it should forms an important component of disaster management training. Such training is a must for all members of law enforcement agencies throughout the length and breadth of the country. However, this very important aspect of disaster management has remained neglected in police training in the state.

In this regard the request made by you to send an expert to your institute to impart training in this field was indeed a first of its kind effort, and it was a pleasant surprise to receive such a request. On your request Dr. H.N. Karade Scientist 'C' of this establishment was deputed to Indore to deliver a talk on the above subject and it was very well appreciated by officers of all ranks who attended this talk.

We would like to put on record our sincere appreciation for this initiative of yours. The training imparted to the officers present will be very useful not only for understanding the physiochemical properties, mode of action, toxicity of chemical weapons & hazards but to deal with such eventualities if and when they arise. Yours efforts in developing 'awareness among police personnel' is a model that is worth emulating by others too. We wish you all the best for your future endeavour.

With kind regards

Mr. Varun Kapoor
Director (IGP)
Police Radio Training School
Indore

*Yours sincerely
M. P. KAUSHIK
