Subject: Evaluation of cyber-forensics training program

Dear Shri Kapoor,

First of all I would like to thank you for sharing the details of your course schedule and sample slides. Having studied these inputs I am of the opinion that the course you are offering appears to be of a suitable level, and your faculty also appear to have the right background to deliver good value to the police officers attending the training.

Your initiative to organize such trainings for the police officers is truly commendable.

I reviewed the sample slides you sent me for the CDR Analysis module, and it is at par with the knowledge the police officers would be expected to have to conduct such investigations on the field.

I encourage you to continue on such forward-looking endeavours and continue to expand the training material and continually update the courseware with the latest developments in the ever-involving field of cyber-forensics.

With best wishes,

Yours sincerely,

K. K. Mookhey
Director

PS: Kindly note that the above is my personal opinion based on the documents shared by your good self, and is not validated by actually attending the training or speaking with the officers who have undergone the said training.
