DO No. 3(12)/2012-CERT-IN  
Dated: 18<sup>th</sup> March, 2013

**APPRECIATION LETTER**

One of the main challenge in this era of Internet before the Law Enforcement Agency is to train their manpower to handle, investigate and analyse the digital evidence. Such digital evidence is now integral part of every crime, be of the nature of civilian or criminal. The police officials working at the police stations need to be made aware of the growing menace of cyber crime and ways and means of handle such crimes. The technology is moving at fast speed. New and newer techniques are being introduced in the market regularly. Such a fast technological changing environment creates challenge before the Law Enforcement Agency to evolve course curriculum and the training programme in such a manner as to train the police officials with little knowledge in handling the technological crimes.

Mr. Varun Kapoor, Inspector General of Police has made concerted efforts towards this direction. He recognised the need, evolved an appropriate training programme using the limited sources and drawing upon the resources from outside and set up the training programme for the police officials in the state of MP. The programme has been evolved in such a simpler manner that a range of police officials of the rank of Sub Inspector of Dy.S.P. has been able to undergo upgradation of their skills in the area of collection, analysis of digital evidence. The model developed by him is simple and appropriate for replicating and emulating at other places. This could not have been done without engrossing himself into the real scenario. The sustain efforts of Mr.Kapoor in this regard are indeed praiseworthy. The police officials trained at PRTS, Indore will not only be great asset to the State, but will also be useful to the country in time to come.

I wish him all the best and success in times to come.

  
(Gulshan Rai)
